171 Chemin des Aucels
84120 Mirabeau - France

20 years of cross-functional logistics positions at operational and corporate level in multinational environments. With a great capacity to adapt to different cultures and to communicate appropriately at all hierarchical level, I am natural self-starter, able to lead complex projects involving multiple stakeholders, recognized as a very focused and creative problem solver, with down to earth approach, ownership and strong bias for action.

EDUCATIONAL BACKGROUND

Agronomy Engineering degree at ENSA Toulouse (1994) (National school of agronomy)

- Specialized in Agronomy (crop science), economics and management.

Biochemistry and organic chemistry degree (Montpellier University 1991)

LANGUAGES

French: Native
English: Fluent (C2)
Spanish: Fluent (C2)
German: Basic (A1)

CORE COMPETENCIES / SKILLS

Project/Program management

- Startup large projects with limited resources, undefined plan and very tight timelines.
- Launch Amazon buildings, covering construction, commissioning of material handling equipment, IT etc…
- Perpetual "risk assessment / prioritization / risk mitigation" decision process.
- Provide frequent on-site monitoring and schedule tracking report to project stakeholders.
- Management of multidisciplinary and multicultural teams, including management of remote teams.

Information Technology

- IT Product management (WMS – CRM) using Agile methods
- Software: Skuid - AutoCAD (certified) - Cognos Reporting Studio (certified) - SQL – Power BI
- Strong data culture: SQL & query builders (DB audit, data cleaning, statistical analysis).
- Advanced VBA programming: "Sparklines for Excel", open-source Data-visualization add-in for Microsoft Excel.

Logistics - Supply-chain

- Modelization of logistics organization (logistics network, warehouse layout, processes).
- ERP and WMS design, set-up, deployment and staff training.
- Organization of warehouses based on products constrains and flow efficiency.

Real Estate / Diagnostics and risk evaluation

- Risk management for EU's largest real-estate program (800+ of sites scoped per year).
- Due Diligence – Environmental and Technical appraisal (land and existing buildings).

WORKING EXPERIENCE

2018-Present Head of Real Estate Due Diligence - EMEA – 11 direct reports – Aix-en-Provence (France)

- Manage Real Estate Due Diligence (DD) in EMEA for all Amazon business lines (Fulfilment, middle mile, last mile). 800 sites surveyed over 12 months, 30M€ budget. Lead a team of 11 DD managers across EU, covering Environmental, Electrical Vehicles requirements, Permitting, Acoustic, Traffic and Technical DDs, to enable the selection of new sites for Amazon expansion. Product management (Software) of EU RE expansion platform (SHIELD).

2016-2018 Last mile delivery - Expansion Lead - Italy / Spain - Amazon Logistics (AMZL) - 6 direct reports

- Lead the setup and expansion of AMZL in Italy (4 sites) and Spain (6 sites of ~ 10,000m² each).
- Including the recruitment of senior managers and coordination of 19 teams involved in this program. After 2 years, AMZL delivers above 75% of Amazon parcels in Italy and Spain main cities.
- Validation of new facilities budget and supervision of equipment supply chain (from procurement to delivery, including spare parts and consumables). Creation of the Launch playbook. Governance.
- Structure the 3-year Plan of Record for AMZL expansion and lead 5 launch managers across EU.

2014-2016 Transportation Tech. Senior Program manager - Amazon Technical services - 5 direct reports – Paris

- Lead the deployment of Amazon new delivery services in FR, IT and ES, including Same-Day delivery, Scheduled delivery and multiple service acceleration projects or Customer Experience initiatives.
- Transportation configurations management in close collaboration with EU Amazon Customer. Experience team and IT teams located in India (EDI – Labels – Manifests – Ship methods).

2011-2014 Industrial refrigeration South Europe - Self-employed - ColdEnergy (Verona - Italy) - Turn Over 15m€

- Project management consulting in Europe (Supply chain, banana ripening, fruit storage).
- Provide expertise in logistic network organization and logistic refrigerated platforms setup.
